

## Senior Systems Engineer

Keno Kozie Associates is a leading, national IT solutions provider specializing in solutions and support tailored to the legal industry. We are actively seeking Professionals to join our Engineering team.

Our ideal candidate is confident, well spoken, hardworking, highly organized with solid technical skills and experience in building relationships with customers. The ability to work in a fast paced changing environment both independently and as part of a team is critical. Extended hours are required when necessary. We offer mentoring and learning opportunities.

### As a Senior Engineer you will take on a leadership role within the department:

- Lead and take ownership of high profile network implementations and projects
- Collaborate with project managers and other project team members
- Assist with quality control efforts to maintain client satisfaction
- Mentoring Junior Engineers in the department Identifying talent and providing guidance to Senior Management on how best to foster and promote success amongst staff.
- Strengthening relationships with existing clients and building foundations for new clients as a one stop source for all IT requirements. Identify new opportunities and make recommendations for upgrades as needed and bring in other K2 departments resources for assistance when appropriate.
- Assist Account Managers with complex proposals and technical presale meetings at clients.

### Requirements:

- Exceptional problem solving and technical troubleshooting skills.
- Significant experience with installing/supporting Windows, Windows Servers and MS Office
- Strong Network Administration experience
- Experience with implementing and supporting various backup and antivirus solutions. Exposure to disaster recovery solutions
- MCSE/related technical certification or Minimum of 5 years of related work experience
- Significant technical expertise with a few of the following technologies:
  - Microsoft Exchange and/or Office 365
  - SQL Server
  - Citrix and/or Microsoft Terminal Server
  - Firewalls, routers and switches (Cisco, SonicWALL, Meraki, Extreme, Dell, HP)
  - Virtualization (VMware, VMware View, Hyper-V)
  - SAN (Compellent, Dell EqualLogic, EMC, etc.)
  - Desktop imaging and deployment technologies
  - Document Management (e.g. iManage, Open Text DM, WorldDox, NetDocuments)

### IMPORTANT NOTE

**Applicants must be located in the Chicagoland area and be authorized to work in the USA for consideration**
